

Conference on Selection for training

ASME & NRO are organising a meeting on recruitment *processes* and *standards* for selection into GP training in Europe.

London, December 2008

The *aim* of the meeting:-

- share present practice
- determine whether it is desirable or feasible to consider looking at defining common standards and processes across Europe

I need names of “*movers and shakers*” from EURACT countries, not just those who may be interested.

This will be an “*Invitation only*” meeting.
